EDUCATION

University of Houston

B.S. in Computer Science, Software Engineering Capstone, 3.5 GPA

Houston, TX

December 2026

Lone Star College

Associate of Science

Kingwood, TX

December 2023

Relevant Coursework

C++ Programming, Algorithms, Data Structures, Computer Org. & Architecture, Database Systems, Computer Networks, Software Design, Software Development, Operating Systems

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++, C#, Python, SQL

Cloud/Infra: Supabase, Vercel, AWS S3, GCP, Firebase, Redis

Technologies: Git, Docker, PostgreSQL, MySQL, WordPress, Claude Code, Codex, QStash

Frameworks/Libraries: React, NextJS, NodeJS, ASP.NET Core 10, Vite, tRPC, React Query, Vitest, OpenAI API

EXPERIENCE

Blueprint

May 2024 - Present

Spring, TX | Contact: america@blueprintuniversity.com

Software Engineer (Lead)

January 2026 - Present

- Promoted to lead a 3-person engineering team, directing architecture and full-stack development of Blueprint Creative as it scaled to 45,000+ users and 1,000+ monthly paying subscribers.
- Architected an agentic AI assistant using OpenAI tool calling that understands workspace context, retrieves creator-education content with video timestamps, executes user actions, and builds multi-trigger workflow automations.
- Led development of collaborative content-production systems, including thumbnail iteration and annotation workflows, modular shared dashboards, global search and commands, granular role-based permissions, and highly customizable data views.

Full Stack Developer

May 2025 - January 2026

- Spearheaded the development of Blueprint Creative, a project management platform for content creators, using Next.js, TypeScript, Tailwind CSS, and Zustand.
- Engineered a scalable serverless backend with Supabase (PostgreSQL), QStash, and Vercel, designing relational schemas that reduced query latency by 70% on key endpoints.

Contract Web Developer

May 2024 - May 2025

- Rebuilt the Blueprint University online course platform using PHP and WordPress, resulting in over 700,000 visits that generated \$30,000 in first-year revenue while capturing 8,000+ newsletter subscribers.

CAVA

May 2022 - May 2024

Houston, TX | Guest Experience Manager

- Co-managed a team of 25 employees, handled high-volume operations under pressure, and trained staff.

PROJECT EXPERIENCE

ts-chas | TypeScript, Vitest, fast-check

March 2026 - Present

- Built and published an open-source TypeScript library for typed error handling and runtime schema validation. Now the data and schema layer of a production SaaS platform serving thousands of paying users.
- Designed every module on a shared type foundation so errors stay typed across module boundaries, removing try/catch and null checks from consuming code.
- Wrote hundreds of unit and property-based tests (Vitest, fast-check) holding 95%+ coverage; published dual ESM/CJS builds with full type declarations and a Mintlify documentation site with a codebase-aware AI chatbot.

Zoo Database System (Academic Project) | JavaScript, NodeJS, MySQL, React, Vite

September 2025 - November 2025

- Led a 5-person team building a full-stack platform modeling a zoo's commercial and operational workflows, with separate customer and employee dashboards.
- Designed a third-normal-form MySQL schema with indexing, triggers, and aggregate reporting queries.
- Implemented a custom Express-like HTTP router on bare Node.js.
